

WEEK 2 DEADLINE DESCRIPTION: ME310 PROJECT 2

DR. C. ALEXANDER SIMPKINS

1. DUE DATE/HOW TO TURN IN

This is due next Wed Mar 25, 2015 by 11:59pm. You can send links to videos (google drive or dropbox), and turn in the document to turnitin.

This is a group assignment, so ONE per group is due.

2. DESCRIPTION

The idea here is to show your narrow concepts have potential to solve the problem. This must be motivated with any means necessary to prove your argument for your approach. You can use calculations, but must have some demonstration that the method works.

You will 'turn in' your progress via a video demonstration, as well as a written description of the specifics of your approach. This can include calculations, drawings, photos, and a text-description of the process. The video can be a cell phone video but must be of enough quality that the functionality is clear.
