

SDSU ME314 Spring 2015: Homework 4 Due Tu May 12,
2015 at 11:59pm

Dr. Alex Simpkins

May 6, 2015

1 Introduction

This is the fourth assignment for ME314. This assignment will consist of a series of problems to solve from the book, and some readings.

You will turn this assignment in on blackboard via turnitin.

2 Readings

Please complete reading chapters 5 and 6, if you have not already.

For the rest of the course material, we have covered the remaining book for the most part (we jumped around and skipped a few areas). Fill out the lecture material with additional readings, just as the lecture has filled out the book material in places. Definitely read through Chapters 10, 14, and 15, as they will be on the extra credit quizzes, and some material will be on the 4th quiz.

3 Problems

5.1, 5.9, 6.1, 6.14
